The Director will provide leadership and overall manageria oversight to their team.
Relation to Supervision:	Works under moderate direction	Works under minimal direction	Works under minimal direction and often without supervision.	Works independently while leading and coordinating all levels of activities including project life cyle, software development life cycle and day to day operations.		
Development:	Complies with development standards while developing and modifying applications of limited scope.	Complies with development standards while developing applications on moderately complex projects, components and subsystems.	Complies with development standards while developing applications on moderately complex projects, components and subsystems.	Complies with development standards while developing applications on moderately complex projects, components and subsystems. Oversees or develops integration of coding/logic when multiple modules are developed by various groups/individuals.	Complies with development standards while developing applications on moderately complex projects, components and subsystems. Sets, recommends and/or enforces standards, methodologies and protocols for the development and	Communicates with senior management of system-wide issues recommending solutions including resources needed, tim required and benefits to be achieved. Assesses the application of new and innovative technologies, methods and concepts. Complies with development standards while developing applications of complex projects, components and subsystems. Establishes the methodology standards and protocols for installation are implementation work. Manages complex projects, components and systems.
Relationship Management:		Works closely with CUIT colleagues on all tasks in the development and maintenance life cycle. May be responsible for monitoring the work of team members and or project teams.	other team members. May oversee	Leads specific infrastructure, systems and applications initiatives. Provides assistance to junior developers; functions as a technical consultant.	goals. May have performance management responsibility for team. Liases with relevant faculty and administrators on various	Responsible for the capabilities and configuration of the team and its preparedness to meet the IT and business requirements of the department. Partners with relevant faculty and administrators to support financial, academic and research goals of the University. Has responsibility and oversight for all personnel decisions.
Education & Experience:	Bachelors degree and/or its equivalent required. Minimum 2-4 years related experience. Familiarity with systems development lifecycle.	Bachelors degree and/or its equivalent required. Minimum 3-5 years related experience. Familiarity with systems development lifecycle.	Bachelors degree and/or its equivalent required. Minimum 4-6 years related experience. Strong experience with full applications systems development lifecycle.	Bachelors degree and/or its equivalent required. Minimum 5-7 years related experience.Expert level experience with full application systems development lifecycle.		Bachelors degree and/or its equivalent required. Minimum 7-9 years related experience. Experience in all relevant applications design and development languages, methodologies and tools. Prio managerial experience required.
Soft skills:	Demonstrates a variety of competencies including teamwork/collaboration, analytical thinking, and strong communication.	Demonstrates a variety of competencies including tearmork/collaboration, analytical thinking, and communication.	Demonstrates proficiency in a variety of competencies including teamwork/collaboration, analytical thinking, communication and influencing skills.	Demonstrates excellence in a variety of competencies including teamwork/collaboration, analytical thinking, communication, influencing skills, and proven ability to act as a change agent.	Demonstrates excellence in a variety of competencies including ability to manage a team, teamwork/collaboration with technical and functional clients/peers, analytical	Demonstrates excellence in a variety of competencies including ability to lead a team, teamwork/collaboration with technical and functional clients/peers, analytical thinking, communication and influencing skills. High degree of emotions intelligence. Proven ability to act as a change agent.
Technical Skills:	Basic skills in some/all of the following technologies: Oracle SQL (pl/sql)	Proficiency in some/all of the following technologies: Oracle SQL (pl/sql). Work experience with People Soft HR and/or Finance applications.	Strong Proficiency in some/all of the following technologies: Oracle SQL (pl/sql), PeopleSoft development tools. Relevant work experience with People Soft HR and/or Finance applications. Participated in a full lifecycle PeopleSoft HR or Finance implementation, GIT, Jira.	Expert level skills in some/all of the following technologies: Oracle SQL (pl/sql), PeopleSoft development tools. Extensive work experience with People Soft HR and/or Finance applications. Lead or Sr. Level contributer on two full lifecycle PeopleSoft HR or Finance implementations. Experience working on enterprise wide projects, GIT, Jira.	Strong Proficiency in some/all of the following	Broad functional and/or technical experience in all relevant applications design and development languages, methodologies and tools such as Oracle SQL (pl/sql), PeopleSoft development too and People Soft HR and/or Finance applications. Strong understanding of integration with other Enterprise Systems Applications and Data Warehouse solutions. Experience with supporting PeopleSoft implementations, upgrades ar installations, GIT, Jira.
